PROFESSIONAL EXPERIENCE

FULL STACK STUDENT

SPARK ACADEMY

- Learn Front-end with **HTML, CSS, Javascript** and **ReactJS** library; and Back-end with **Node.JS** and **Express**. For Database, I learn **SQL** on Neon.
- Learn DevOps basics: **CI/CD** pipeline, deployment on Github Pages and Netlify.
- Learn debugging, Chrome Console tool, reviewing others' codes.
- Besides having personal project, I have gained real work experience when working on the external [Wikimedia Finland](#) project.

PROJECTS

SOFTWARE DEVELOPER - WIKIMEDIA

[Link to Git](#)

- **Technology:** HTML, CSS, Javascript, ReactJS, Express
- **Muinaismuistot.info:** Develop a save button to the web page, and button opens Wikimedia Commons Upload Wizard with pre-filled information from muinaismuistot.
- **Listeria(Tabular Data from SPARQL):** Implement a SPARQL query and saves the result to WikiPage :
 - Front-End(React): Display data from Wikidata and data for Wikimedia Commons/ button components on front page.
 - Back-End(Express): Login to Test Wikipedia using API and POST method to save result data in Wikimedia Commons.

STOIC QUOTE GENERATOR

[Link to Git](#)

- **Technology:** HTML, React.js, Material UI, Styled Components
- I use Axios to fetch Stoic Quote API and by practicing using useState, useEffect, useCallback hooks to make interactive web page.
- I apply Glassmorphism CSS style into the quote block for better UI.

PORTFOLIO WEBSITE PROJECT

[Link to Git](#)

- **Technology:** HTML, TailwindCSS, React.js with Next.js
- The project shows my knowledge in semantic and non-semantic HTML, CSS Selectors, Grid, Flexbox & Animation, and also React build by Next which make my website more fast and well-performed.
